# You're Invited

To Join the Math Maker Movement

When you create your own math, you forge a personal connection
to mathematical concepts and relationships.
And it's fun!

Make up a math game, write a story or poem, draw a comic, or pose a problem.
Create math art, think up a challenge question, or write a puzzle.
Submit your math creation to the Student Math Makers Gallery,
and we'll share it with viewers all around the world.

Want to see the math other students have made?
Visit tabletopacademy.net/math-makers.

Take a high-resolution photo of your creation
and of the signed legal permission form (next page).
For written-text math creations, you can save the file as TXT, RTF, or PDF.
Upload them to a file-sharing service like Google Photos/Docs or Dropbox, and send the link to:
MathMaker@TabletopAcademyPress.com
Do not send photos or other attachments via email. We will not open them.

Or mail a copy of your creation and permission form the old-fashioned way to:
Denise Gaskins, PO Box 14, Boody, IL 62514 USA
Do not send the original item. We cannot return physical submissions.

We'd love to have you join us!

Denise Gaskins, Math Makers editor

Math Makers Permission Agreement

I, _____ ("Licensor"), am the original creator ("Author")—or legal guardian of the Author, if underage—of the math submission(s) attached to this form (the "Selection"). I freely grant to Denise Gaskins of Tabletop Academy Press ("Licensee") all rights necessary to use the Selection as specified below (the "Agreement").

Selection Information:

Title or Description: _____

Author's Given/First Name: _____ Age (when Selection was created): _____
(Their personal, individual name, not the family name. For example, just write "Lisa," not "Lisa Smith.")

Author's Home Country: _____

Publication Information: If the Selection is chosen for publication, it will appear on the following webpage (the "Site"): *Student Math Makers Gallery,* initially hosted at TABLETOPACADEMY.NET/MATH-MAKERS.

The Selection may also appear in the following book (the "Work"): *The Student Math Maker's Anthology* (title tentative), edited by Denise Gaskins, to be published by Tabletop Academy Press.

Grant of Rights: Licensor grants to Licensee and Licensee's successors and assigns the worldwide, perpetual, nonexclusive right to reproduce and distribute the Selection in all editions of both the Site and the Work and all derivative versions of either the Site or the Work, in all media now known or later devised, including related products or promotional materials published and distributed in conjunction with either the Site or the Work.

Warranty: Licensor warrants that he/she/they have the right to grant permission for the use of the Selection as specified above and that the Selection does not infringe the rights of any third parties.

Credit: Editions of either the Site or the Work that include the Selection shall identify the Author by given/first name, age, and country. No other identifying information shall be made public by the Licensee.

Sample: If the Selection is chosen for the Work, Licensee shall furnish upon publication one digital copy of the Work (in all electronic formats available at that time) to Licensor at the email address provided below.

Miscellaneous: This Agreement may not be amended except in a written document signed by both parties. If a court finds any provision of this Agreement invalid or unenforceable, the remainder of this Agreement shall be interpreted so as best to effect the intent of the parties. This Agreement shall be governed by and interpreted in accordance with the laws of the State of Illinois, United States. This Agreement expresses the complete understanding of the parties with respect to the subject matter and supersedes all prior representations and understandings.

Licensor's Signature and Contact Information:

Signature (Author or Legal Guardian): _____ Date: _____

Printed Name: _____

Email Address: _____

Mailing Address: _____

_____

Permission Agreement—Plain English Translation

You (the student or legal guardian) are the "Licensor." That means you created the math item and have the right to control how it is used.

The "Selection" is your math game, story, poem, art, problem, puzzle, or whatever you are submitting. You may submit more than one item.

You may also submit items more than once (but each time, be sure to include a new permission form).

Denise Gaskins of Tabletop Academy Press is the "Licensee" who wants permission to use your math creation.

Selection Information: We need this to give you proper credit for your creation. Please write neatly!

Give us the student author's personal, individual, given name as you would like it displayed.

For privacy, DON'T include the student's family name.

Publication Information: This describes the *Student Math Makers Gallery* website and the *Math Makers* book in which we may use your math. We don't promise to use every item submitted. But if there is a problem with your creation (for example: a story that's too long, a puzzle too vague, a drawing that won't display well, or you used a trademarked character), we'll try to work with you to make it fit.

Grant of Rights: You give us permission to use your math creation on the *Student Math Makers Gallery* website. We can also use it in the *Math Makers* book and in any related publications or materials, such as blog articles or social media posts. If something happens to Denise, someone else (the "successors or assigns") may continue to use your math creation.

These rights are *nonexclusive*, which means you still own the math creation and can use it yourself or let other people use it, too.

Warranty: You promise that the math is your own creation, not copied from someone else. It can be similar to another math item you've seen (for example, many math puzzles are like folk stories that have been passed down and retold for generations), but it cannot be an exact copy.

Also, DON'T use trademarked characters (such as Disney or Star Wars). Change their names and turn them into general characters (like "a princess" or "a rogue starship pilot").

Credit: We promise not to publish any private information except the student's given name, age, and country.

Sample: If we choose to include your creation in the *Math Makers* book, then whenever it is published we promise to send an electronic copy to the email address you provide.

Miscellaneous: Legal stuff, in case there's ever an argument about our agreement.

Licensor's Signature and Contact Information:

Your signature means you give us permission to use the math creation.

We need your email in case we have questions about your submission.

Your mailing address is a back-up form of contact. We don't expect to send you anything by physical mail, but who can tell the future?
